

「**AT LAST.** AN INVISIBLE BARRIER
FOR PAINT, GELCOAT AND GLASS
THAT ACTUALLY WORKS」

The Preservation of Perfection

TRIBOS®

PROVEN IN THE WORLD'S
HARSHEST ENVIRONMENTS

There are many exotic sounding specialist polishes and ceramic or silicon based miracle products. Unfortunately, most of these treatments fail to live up to their promises when it comes to offering serious, long-term protection in the marine environment. This fact led our innovative team at Hielaman to create a genuine scientific breakthrough – TRIBOS®.

Our paint and glass products have been tested in the world's harshest environments to deliver:

- An incredibly durable 'chemical barrier' that guarantees protection like no other
- A 'better-than-new' shine that lasts over time and returns with each wash-down
- The ultimate glass protection coating that helps improve visibility, safety and ease of cleaning
- Protection against UV, acid rain, oil and exhaust fumes, sea salt, bird lime...
- Rejuvenation to worn or tired looking paint
- Extended life for your paint and glass surfaces

MARINE

FROM THE LARGEST MEGAYACHTS
TO PERFORMANCE RACE CRAFT

TRIBOS® has proved to be the time-saving surface coating product the world of boating was waiting for.

- Applied globally by production and refit yards
- Approved by leading paint suppliers
- Gives a fabulous and impressive finish with minimum effort
- Troublesome diesel and exhaust stains are easily removed with a simple wash-down
- Saves cost and crew effort
- Restores faded paint or gelcoat to its original glory
- Will provide an effective solution to warranty claims

CUTTING EDGE TECHNOLOGY THAT PROTECTS YOUR CRAFT

MARINE TESTIMONIALS

THE MEMBERS OF THE TRIBOS® FLEET RETURN YEAR AFTER YEAR

"Our hull 678, MY Go, has been treated with your Tribos® treatment system. Now 5 months later the cleaning is still a light job with exhaust marks on the hull, dirt marks and rain stripes still really easy to remove even without mild soaps. The crew has informed us that it takes them less time to do the washing down of the yacht."

TOM DE VRIES MANAGING DIRECTOR, DE VRIES GROEP

TRIBOS® IMPROVES ON PERFECTION EVEN ENHANCES THE APPEARANCE OF NEW PAINT

"Following a recent paint finish it was important to preserve and protect the surface due to the dark colour of our topsides and TRIBOS®'s background with Marine, Aviation and Automotive industries was a perfect answer. I didn't think we could improve on the surfaces' appearance but since Tribos® was applied, it is better than I could have imagined."

CAPTAIN STUART BRANSON, JETHOU

TRIBOS® PROVIDES A REAL COST BENEFIT

"I was very impressed with the TRIBOS® system and the finished result. If you can delay a paint job on a yacht's hull/superstructure for a few or more years, then having this system applied has got to be a serious consideration for any captain."

CAPTAIN ROBERT BLEECKE

AUTOMOTIVE

"THE WORLDS MOST DURABLE PAINT AND GLASS COATING" NISSAN

- Approved by leading manufacturers worldwide
- Successfully tested against 26 leading products
- Preferred supplier to major manufacturers such as Nissan and Mazda
- Often applied in factory as standard
- The preferred supplier to dealers globally from Ford to Ferrari

AVIATION

FROM LIGHT AIRCRAFT TO THE FASTEST EXECUTIVE JETS

TRIBOS® has proved to be the ultimate time-saving product that the aviation industry has been waiting for.

- Tested and approved for use by leading aircraft manufacturers
- Applied by builders of new aircraft and by maintenance teams worldwide
- Cuts cleaning time and cost dramatically
- Improves fuel efficiency and air flow over the surfaces
- Pilots report more efficient aircraft performance after TRIBOS® treatment

TRIBOS®. CUTTING EDGE TECHNOLOGY THAT PROTECTS YOUR YACHT

THE SCIENCE OF SURFACES

- The TRIBOS® polymer is a chemically complex, high-performance sacrificial barrier.
- The TRIBOS® polymer creates a chemical bond to the surface, then 'tails' of each individual polymer bond together to form a cargo net, making that bond even stronger. This forms the unbeatably durable, high gloss, transparent layer.
- The TRIBOS® polymer is impregnated with titanium oxide which reflects UV light, preventing colour fade.

ALL IN THE APPLICATION

All this technology is useless if the product is not applied properly. The TRIBOS® polymer can only be applied by our trained and certified applicators using specially developed techniques and purpose-designed machines to control the process with the necessary precision.

Without preparation, protective coatings simply don't work as well and will fail prematurely. The TRIBOS® preparation process ensures a 100% contaminant free surface.

THE CLEAR DIFFERENCE

Our glass treatment is applied through a carefully controlled 3 step process that ensures that the treatment achieves maximum efficacy

- Surfaces are mechanically prepared and the microscopic pores are thoroughly cleaned
- The surface is then cleaned using a chemical neutraliser
- The polymer is then applied and left to cure in the air

THE TRIBOS® GLOBAL NETWORK

We have created a global network of TRIBOS® distributors so that we can treat your yacht wherever you are.

TRIBOS® can only be applied by one of our professionally accredited and trained applicators; it's the only way that we can ensure the treatment is applied correctly and ensure our warranties. If your yacht is not in one of the areas we cover we can always send one of our teams to you.
